Senior Full-Stack Engineer with 7+ years building production products in TypeScript, React/Next.js and Node.js/NestJS, starting as a full-time engineer on client projects in 2019. Currently a Senior Consultant at Thoughtworks, building a GPU capacity marketplace for a global leader in AI computing. Previously led product builds end to end at Glue Labs, from API and schema design to UI. Mentor to 20+ engineers and the go-to frontend engineer across multi-team programs.

Skills

Languages - TypeScript, JavaScript, SQL, HTML/CSS; working knowledge of Java and Python
Frontend - React, Next.js, React Native, Vue, Tailwind CSS, Redux, Zustand, React Query, Apollo Client
Backend - Node.js, NestJS, Express, REST, GraphQL, role-based access control
Data - PostgreSQL, MongoDB, Redis, TypeORM
Observability & Tooling - Datadog, SigNoz, Jest, Git, GitHub Copilot, Firebase, Heroku

Work History

2025-03 - Current

Senior Consultant - Developer

Thoughtworks, Bengaluru

GPU capacity marketplace for a global leader in AI computing · *Next.js, Python, SigNoz · 2026 - Current*

- Building a marketplace where the client's certified cloud partners list GPU capacity (platform, quantity, data center location) and enterprise buyers find and contract it.
- Implemented token-based RBAC for three roles (customer, provider, platform admin), controlling which data and actions each role sees.
- Built a multi-stage contract workflow: buyers request capacity from several providers at once, providers accept or counter-offer, and either side can renegotiate or cancel; counterparty names stay hidden until acceptance to prevent bias.
- Built decision tools for each role: filters and a global map view for buyers, graphs for providers to compare competing requests, and an admin review queue that approves capacity before it goes live.
- Part of the team that grew the product from an internal Thoughtworks initiative into a billable client engagement in mid-2026.

B2B parts inventory & ordering platform for a Fortune 500 agricultural machinery maker · *React, Java, Datadog · 2025 - 2026*

- Senior frontend developer on a platform the manufacturer's dealers use to place bulk parts orders, across 4–5 delivery teams.
- Owned the inventory pages, showing available stock alongside dealer requests that inventory couldn't fill.
- The only senior frontend developer on the India side and the go-to engineer for critical frontend bugs.
- Picked up Java to contribute across the stack, using GitHub Copilot's agent to ramp up quickly; pair-programmed with and mentored junior developers in React.

2021-12 - 2025-01

Senior Software Engineer

Glue Labs Private Limited, Delhi

- Tech lead for major product builds, owning architecture, APIs and delivery (see Projects), and UI tech lead for client products.
- Led development, testing and debugging of key product features, cutting post-release bug reports by 30%.
- Interviewed and mentored 20+ interns; 85% moved into full-time engineering roles.
- Co-authored the intern training program, cutting onboarding time by 40%.

2020-07 - 2021-12

Software Engineer

GeekyAnts Software Pvt Ltd, Bengaluru

- Built complex client UIs with React and Material UI, and led code reviews and debugging on internal projects.
- Built a live-streaming video communication app with Vue and the Agora SDK.

2019-02 - 2020-06

Software Engineer Intern (full-time on client projects)

GeekyAnts Software Pvt Ltd, Bengaluru

- After a 3-month training program, worked full-time as a developer on live client projects while completing my B.Tech; the Software Engineer title followed on graduation.
- Built a React Native clone of BookMyShow, presented at the company demo day.

Projects

Video Maker · *Next.js, TypeScript, NestJS, PixiJS, Puppeteer, FFmpeg*

- Tech lead on an internal product that renders videos from web scenes: Puppeteer captures frames and FFmpeg assembles them at a stable frame rate.
- Designed the database schema and all NestJS APIs, cutting data retrieval time by 40%, and guided junior developers on the frontend.

Mailer App · *Next.js, TypeScript, NestJS, React Email*

- Designed the backend architecture and APIs for an email deployment system.
- Replaced static MJML emails with user-editable dynamic templates built in React Email.

Dashgen · *Next.js, NestJS, PostgreSQL, Redis, React Query, Zustand, LangChain*

- An AI assistant hub that lets users chat with multiple leading AI models cost-effectively; improved the UI and accessibility of the chat experience.

Education

2016-08 - 2020-07

Bachelor of Technology, Computer Science & Engineering

Chitkara University - Baddi, India

CGPA: 9.40
